Dear Examiner:

This Information Disclosure Statement ("IDS") is submitted pursuant to 37 CFR § 1.56. The filing of this "information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in § 1.56(b)." See 37 CFR § 1.97(h).

The applicant believes that no fees are required with this communication; however, if any additional fees are required, the Commissioner is authorized to pay such fees from Deposit Account No. 50-0545. Should anything further be required, a telephone call to the undersigned at (312) 226-1818 is respectfully invited.

Dated: October 31, 2005

Respectfully submitted,

Joseph M. Kinsella Jr.

Dear Sir:

If any charges or fees must be paid in connection with the following communication, they may be paid out of our Deposit Account No. 50-0545.

PUBLICATION NO.	PUBLICATION DATE	BASIS FOR RELEVANCE
DE 34 39 431 C3	November 28, 1991	The mechanism (10) for flame cutting contours in a tube (12) comprises a projecting arm (20) or transverse portal member. This is movable (1) parallel to the tube axis (14) and vertically adjustable along at least one upright. A burner holder (23, 21) with the arm, with a drive (11) to rotate the tube about its axis. The holder is secured on a carriage movable along the arm. It carries a member which is rotatable about a vertical axis and has the burner swivelable about an axis and has the burner swivelable about an axis at right angles to the rotational axis (25).

EP 0 350 645 A2

January 17, 1990

For machine flame cutting or welding of a branch tube to a tube, a rotary transducer is attached to the chuck of the tube drive, supplying the rotary angle to a control unit. The torch is guided along the cutting or welding line while the tube is rotated via the chuck and/or drive rollers. The actual angle and/or actual speed of rotation of the tube and/or the actual radial position of the tube are measured and are corrected when they deviate from the desired values. Transmitter and receiver are fitted for measurement of speed and displacement.

DE 100 27 509 A1

December 13, 2001

The milling machine has a gantry with energy chain and guide track for at least one carriage, a traveling machine bed (4), a traveling machine table (5) and an automatic tool changing unit (6). The gantry is in the form of a circle-of-arc gantry (7) with both arc ends fixed to a foundation (8), and has a base body on which the guide track (9) is mounted.

Should anything further be required, a telephone call to the undersigned, at (312) 226-1818, is respectfully invited.

Respectfully submitted,

Dated: October 31, 2005
